

GREYWATER/RAINWATER BUSINESS SEEKS SYSTEM TECHNICIAN

WaterSprout is a design/build company based in Oakland, California. We specialize in custom greywater and rainwater systems for both residential and commercial projects. WaterSprout is known for innovative design and high quality work. Over the past twelve years we have designed and installed many of the first systems of their kind all over the Bay Area.

System Technician

This will start as a part time, 20 hour per week position, with the intention to transition into full-time work. We are looking for a highly motivated person to join our dynamic team with at least 1 year of work in a related trade (plumber, irrigation, landscaping etc.). The job will consist of installing and maintaining systems on project jobsites. Pay rate \$25-30 based upon experience.

Desirable skills include:

- PVC piping work
- Pumping systems, sump pumps, well pumps, etc.
- Waste plumbing and systems
- Electrical systems, custom controller builds, PLCs
- Existing work experience in the greywater/rainwater industry highly valued!!!!

Must have:

- CA driver's license
- Great communication skills
- Clean driving record
- Strong work ethic
- Attention to detail and pride in work
- Enthusiasm and curiosity for water reuse and sustainable technologies
- Willingness to take direction and learn new skills.

Must be able to:

- Lift 50lbs. and perform physical work for extended periods
- Be flexible and creative in problem solving
- Successfully work both individually and as part of a team
- Quickly and efficiently accomplish tasks in a highly organized manner
- Interact with clients in a communicative and professional manner

Company Benefits

- Health insurance
- Life & Disability Insurance
- Paid Sick Leave
- SEP IRA (3-year eligibility)
